EXPERIENCE

American Express (Eviden)
Software Development Engineer

Phoenix, AZ, USA
09/2024 – Present

- Spearheaded mainframe-to-Spring API migration using agents, modernizing .NET/XML services and accelerating delivery by 38%.
- Governed AI cloud connectors, MCPs, vector DBs, gateways, and alerts, reducing platform issues by 43%.
- Architected cloud-init provisioning across AWS, GCP, on-prem, shrinking setup 53% and saving \$92K annually.
- Automated RAG user-story platform for 60+ teams, eliminating PM overhead and saving \$204K yearly.
- Orchestrated OpenTelemetry ingestion to ELK, shortening root-cause time 27% and reducing Splunk licensing \$58K.
- Strengthened security with KMS rotation, IAM enforcement, Vault certificates, lowering audit findings 31% organization-wide.
- Accelerated incident recovery via auto-remediation, improving MTTR 34% and avoiding \$101K annual outage costs.
- Enhanced containerized inference on Lambda, raising microservice uptime 37% and trimming support spend \$76K.

Arizona State University w/ Integrated Travel
Team Lead, Analytics

Tempe, AZ, USA
07/2024 – 09/2024

- Engineered Airflow–Redshift–MLflow orchestration, shortening training cycles 15% and stabilizing nightly SLA compliance.
- Consolidated multi-source ETL with AWS Glue, raising data accuracy 21% and curbing reconciliation toil 46%.
- Streamlined SQL and R forecasting models, improving Net-Zero route predictions 19% for municipal planning stakeholders.

Cognizant (Credit Suisse)
Programmer Analyst

Chennai, India
01/2021 – 12/2021

- Optimized Kafka–Spark pipelines, cutting financial ETL latency 12% and scaling throughput for 7.3M events.
- Expanded Azure Kubernetes capacity, improving microservice scalability 18% and trimming over-provisioned compute \$111K/y.
- Devised HIPAA-compliant Spring Boot services, accelerating Medicare workflows 20% while tightening audit traceability.
- Piloted Selenium regression harness, increasing release reliability 33% and reducing hotfix frequency 44%.

Adani Education (MCMIT)
Device Usability Researcher

Chhattisgarh, India
01/2022 – 07/2022

- Constructed GCP IoT analytics platform, increasing student engagement 23% through telemetry-driven content personalisation.
- Implemented Crossplane IAM and feedback dashboards, boosting participation 25% and enabling GDPR-aligned consent reporting.

SKILLS

Development Tools

Python, Java, SQL, Shell, C++, JavaScript, Scala, PHP, R, React, Angular, Django, Flask, Spring, Node.js, Go.

Data & Cloud

CI/CD, Git, AWS, GCP, Azure, Splunk, MongoDB, Docker, Kubernetes, Kibana, Terraform, Jenkins, Postman, BigQuery,Databricks, Hadoop, Spark, Tensor, Keras, Pandas, NumPy, Tableau, PowerBI, Graph QL.

Certifications

GCP 2025 PMLE,CompTIA 2024 Security+, AWS 2024 Solutions Architect Associate, Oracle 2023 FA, IBM DSP

PROJECTS

Rayz — ML Inference Deployment

12/2024 – 02/2025

- Deployed Torch-TensorRT inference on AWS, reducing study latency 41% under mixed-precision batching.
- Configured autoscaling with GPU/CPU balancing, elevating utilization 17% and cutting idle costs \$18K quarterly.

Sustaining Balance — Cloud Data Pipeline

01/2024 – 05/2024

- Provisioned Glue–Redshift pipelines processing 53K records, decreasing refresh windows 28% across analytics dashboards.
- Established FastAPI Transformer service on Lambda, improving sentiment accuracy 44% with secure CI/CD gating.
- Built GeoPandas–Tableau visualizations, enabling policymakers to prioritize 12 high-impact interventions from ESG correlations.

Lockerit — Voice-Authenticated Encryption Platform

03/2025 – 05/2025

- Designed AES-256 with rotating keys, strengthening removable-media protection 52% against replay and cloning attacks.
- Enforced voice-biometric key derivation, blocking 100% unauthorized access attempts during adversarial penetration tests.

EDUCATION

08/2022 - 05/2024

GPA: 4.00
